

Veteran Responses to Status of Employment

Summary

VETARAN RESPONSES	UNEMPLOYED	EMPLOYED	UNABLE TO WORK	RETIRED	FULL TIME STUDENT	DISABLED	TOTAL RESPONSES
RESPONSE BEFORE INTERVENTION	387	226	26	25	9	1	674
RESPONSE AFTER INTERVENTION	271	282	66	38	17	0	674

Findings:

1. Every veteran who reported to be a full time student, found employment after graduation.
2. Every veteran who reported to be a full time student, was reportedly unemployed on the earlier survey.
3. All unemployed veterans either remained unemployed or became full time time students in the latter survey.
4. All employed veterans either remained employed or retired from job in the latter survey.
5. Strangely, 17% of previously unemployed veterans reported to be 'Unable to work' in the latter survey.

Conclusion:

1. Employment and lack of it, is 100% correlated with education.
2. Full time student education seems to be the only factor that helps unemployed veterans gain employment.
3. The 'education database' was sadly found to be sparse. We suggest further systematic data collection should be employed to gain more insights into the difficulties faced by veterans to enroll full-time as students if need be and exercise their G.I. bill rights.
